REFOREST

Innovative **Tools** for **Sustainable** Agroforestry

agroreforest.eu

At the heart of ReForest are practical, science-based tools that empower you to design, adopt, and evaluate agroforestry systems.

Why choose ReForest Agroforestry tools?

- Boost **productivity** by raising yields and diversifying income

- Build **climate resilience** with improved microclimates, crop and animal protection and carbon storage

- Enrich **biodiversity** with healthier soils, richer habitats and stronger ecosystems

- Decide **with confidence** using proven models, real data and expert insight

Our tools allow:

- **Farmers and landowners** to explore business models, peer learning and technical guidance

- **Policymakers** to base decisions on robust field-tested data

- **Researchers** to collaborate, share data and develop innovative practices

- Agroforestry **value chain actors** to discover new opportunities and sustainable markets

ReForest Engagement Platform & Knowledge Hub

One Place for Everything in Agroforestry

- A collaborative space connecting farmers, researchers, and policymakers

- Access various resources including case studies, articles, videos, and good practices

- Join thematic groups & discussions
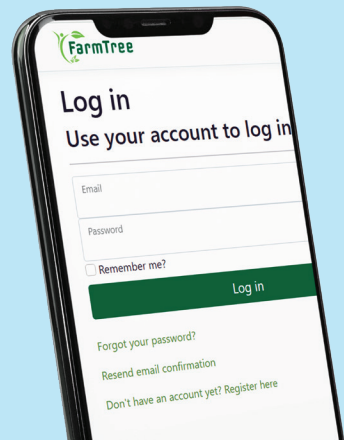

- Share knowledge and find solutions

RESEARCH CENTRE
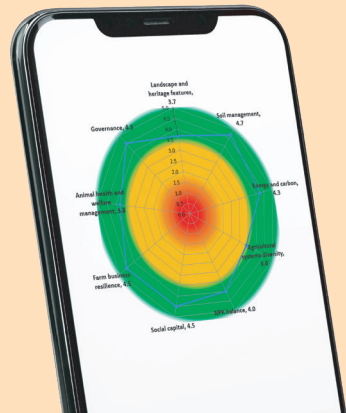

FarmTree Tool

Your Farm, Your Future

- An interactive tool to test how agroforestry can work on your land

- Compare agroforestry with conventional systems

- See productivity, profit, and ecosystem benefits

- Make data-driven farming decisions

# Public Goods Tool

Measuring What Matters

- Assess the environmental and social benefits of your farm

- Evaluate soil, biodiversity, water, and more

- Identify strengths and improvement areas

- Support funding applications with clear evidence

University of Reading

ORGANIC RESEARCH CENTRE

Agroforestry Map of Europe

Discover Agroforestry at a Glance

- Interactive map with national and regional data

- Discover where and how agroforestry is thriving across Europe

- Real-life examples

- Inspires new projects

DeFAF
Deutscher Fachverband
für Agroforstwirtschaft

Dynamic management tool for AF systems at farm level

Make well-informed decisions

- Grounded in real-world case studies
- Probabilistic simulation of agroforestry investment outcomes
- Explore institutional support and eligibility criteria
- Reduce risk in transition decisions
