

Tools for Tree Species Selection for Agroforestry Systems Working Group

Who you will meet there

DigitAF and **ReForest** projects partners

Agroforestry **researchers** and **data analysts**

DigitAF and **ReForest** Living Lab representatives

Practitioners and agroforestry **advisors**

Motivation & Objectives

Identify and **compile** existing **tools** for **tree species selection**

Develop a structured **Tool Catalogue** with a common, **user-friendly interface**

Analyse collected **data**

Improve and **expand tools** through data collection and **user feedback**

Activities

Mapping and referencing **available selection tools**

Field testing in Living Labs

Expert discussions on improving **tree species selection criteria** and **tool integration** and optimisation

Main Outcomes

A comprehensive **Tool Catalogue** for **agroforestry species selection**

A harmonised interface for existing selection tools

Enhanced decision-making support for agroforestry practitioners

Real-world validation and improvements through **Living Lab testing**
