AN ENGAGEMENT PLATFORM FOR AGROFORESTRY ENTHUSIASTS TO COLLABORATE, CO-CREATE, AND SHARE KNOWLEDGE

The ReForest Engagement Platform is a virtual hub for agroforestry enthusiasts to collaborate, share solutions and needs, and drive the adoption of sustainable land management practices across the entire value chain.

Developed under the ReForest Horizon Europe project, the platform provides farmers, researchers, policymakers, and advisors with access to knowledge, decision-making tools, and opportunities to promote sustainable land management practices.
